

INTERIM EMPLOYMENT REFERENCE

Mr Tomáš Vykoukal, born 20 August 1975, has been employed by our company since 1 February 2012 and currently works as a Senior Consultant in our Analytics Division.

We love IT! As a Digital Service Manufactory, we help our clients master the challenges of digitalisation with customised solutions: digital products, modern, fit-for-purpose IT, and a focus on the people who use it. At nine locations across Germany and Poland, more than 400 colleagues work together to develop solutions that help companies and organisations across all industries become more successful, from strategy through to operations.

Mr Vykoukal's role primarily involves working as a Senior Consultant. In this capacity, he has mainly been involved in the implementation of demanding Data & Analytics solutions. He has taken on tasks across the entire development lifecycle, from requirements gathering, modelling and design through to the implementation of data transformations and the development of meaningful reports and dashboards.

In addition, Mr Vykoukal has worked in software development, creating customised applications. He has also delivered various training courses in the Oracle environment.

Mr Vykoukal has very good, in-depth technical expertise, including in adjacent areas, which he consistently applies for the benefit of our company. He demonstrates particular strengths in the following areas:

- Supporting the structuring and prioritisation of business requirements
- Taking responsibility for the analysis of business requirements
- Assuming subject-matter responsibility for the client
- Developing and coordinating technical Analytics solutions of medium to high complexity
- Taking responsibility for solution design and technical conception
- Serving as the client's point of contact throughout all testing phases
- Taking responsibility for the analysis and resolution of defects across the overall Analytics solution landscape

He has applied these capabilities with great success in a wide range of client engagements, including:

- Development of ETL pipelines for complex data warehouse systems
- Responsible analysis of business requirements / requirements engineering
- End-to-end consulting for large-scale data warehouse systems (analysis, modelling, development and operations)
- PL/SQL development for business-critical applications
- Development of prototypes for pre-sales activities
- Support for the migration of Analytics platforms
- Support in the development of OPITZ CONSULTING's AI platform OC|RIVUS
- Delivery of training courses in SQL, PL/SQL and Oracle BI Publisher

For the benefit of our company, he continuously expands and updates his extensive expertise, with consistently good results, through regular participation in professional development and training programmes.

Thanks to his logical and analytical thinking, he finds independent, well-balanced and accurate solutions even to difficult problems. Mr Vykoukal consistently demonstrates a high level of commitment and loyalty to the company and is always willing to take on additional responsibility. Even under difficult working conditions and significant pressure, he consistently performs all tasks in a good manner.

He performs all tasks completely independently, with great care and in a well-structured and thoroughly considered manner. He always works calmly, thoughtfully, in a goal-oriented way and with a high

degree of precision. His performance is consistently strong in both qualitative and quantitative terms. Mr Vykoukal is exceptionally reliable at all times.

He successfully puts the solutions he develops into practice and consistently achieves good work results. Particularly noteworthy is his continuous willingness to learn new or unfamiliar technologies. In this respect, Mr Vykoukal distinguishes himself by readily embracing new challenges and getting up to speed very quickly. He also makes use of AI in this context. He has understood the paradigm shift towards AI-supported, specification-driven application development and has already applied it comprehensively in practice. For example, front-end artefacts developed by Mr Vykoukal within a very short period of time were successfully deployed to production for clients within days. We are consistently very satisfied with Mr Vykoukal's performance.

He is highly regarded by everyone for his consistently friendly and composed manner. He is always helpful and courteous and, where necessary, is willing to put his personal interests aside. His conduct towards supervisors, colleagues and clients is exemplary and loyal in every respect.

This interim employment reference is issued at Mr Vykoukal's request, which we are pleased to accommodate. We thank him for the consistently good work he has delivered in the past and look forward to continuing our positive working relationship.

Nuremberg, 30 June 2026

Jürgen Fischer / Head of Analytics
